SITCO

شبه الجزيرة لتقنية
نظـم المعلومات

SITCO is one of the leading companies in Saudi Arabia, providing comprehensive support and technological solutions based on the latest methods rooted in systematic administrative and scientific principles.

Founded in **2010** to meet the market's demand for specialized information technology companies, **SITCO** has established itself as a pioneer in delivering digital business solutions. Since then, it has gained the trust of numerous organizations in both the public and private sectors, with operations now extending to Bahrain and Jordan.

COMPANY
STRATEGY

Our **Vision** is to be the premier provider of E-business solution services in the region by offering the best expertise, services, and products.

Our **Mission** Building effective and long-term relationships with our clients by providing exceptional services based on innovation and creativity

Our **Objectives** Committed to delivering the best possible experience to our clients. Whether its software development, network infrastructure, or cloud computing solutions. Our team of experts is always looking for new ways to enhance our clients' businesses and help them achieve their goals.

AREA OF EXPERTISE

Our company offers a wide range of E-business solutions to our customers, including information technology services, customized application development, mobile app solutions, archiving solutions, expert advice and analysis in the technology field, modern marketing strategies, network and security services, ERP systems, administrative communications, technical personnel outsourcing, and equipment supply. We also provide brand identity development solutions, professional design services, and additional support services such as hosting, email management, and more.

MAIN OPERATIONS

Our team in **SITCO** has designed a flexible and resilient work system to meet the needs of our customers, ensure results are aligned with project's vision and achieve the project's goals.

In the field of information technology,
we collect and analyze information then submit the necessary recommendations, work plans and schedules. it is vital to us that tthe client stays fully informed on the progress of the project evert step of the way, so that we are able to respond to any changes or developments during the project, with the provision of support services and technical support.

AUTOMATION

At **SITCO**, we strive to become a strategic partner for digital transformation across a wide range of sectors. Our goal is to be a leading solutions provider that offers a seamless user experience. Our solutions are uniquely designed to provide unparalleled support and include, but are not limited to:

Web and mobile applications

Portals and web applications

Self service and workflow automation

And other custom solutions

BUSINESS INTELLIGENT

Our company offers an enterprise-ready, all-in-one Business Intelligence and Data Visualization solution designed for users of all levels. Our platform combines self-service capabilities with a seamless user experience, providing you with the tools you need to take action. With our BI solution, you have access to an open platform that ensures ease of use and reliability, empowering you to make informed decisions based on real-time data.

ARCHIVING SOLUTIONS

Archiving is vitally important for information management and can give a business greater control over their information processes. Data that is not archived is harder to locate, secure, and appropriately disseminate if stored in a local environment – such as an employees' laptop – and thus will be inaccessible to other users. This will eventually have a negative effect on business functions and employee productivity.

PORTALS & WEBSITES

HOME   SERVICE   PORTFOLIO   CONTACT US

The value for companies and institutions is no longer limited to their physical assets. The virtual world has become equally as important, turning accounts and disrupting financial markets and investor accounts as well, to become the leader of the world of services and goods, and to prove to everyone that it is the best due to the benefits it offers to users.

CONSULTING & ANALYSIS

Consulting and system analysis is one of the most important steps in which applications and solutions are built, as it is the diagnostic process for cases that require the rescue, treatment or development from a technical partner. That's why you need the skills and **competencies that SITCO** seeks to provide to advance the services you provide.

TRAINING
& DEVELOPMENT

At **SITCO**, we understand that the training, development, and qualification of our workforce are essential components of success in any sector. We believe that the assessment process before and after the implementation of any project is crucial to ensuring its success, and this is a key feature of our company and our dedicated team of professionals. Trust us to deliver exceptional results through our commitment to continuous development and improvement.

NEWBORN FOOTPRINTING SOLUTION

Based on years of experience, Our Partner CertaScan has created a precise process for identifying infants that is simple to implement and use in a hospital setting. Our Infant Safety System provides the digital capture and storage of newborn footprints, baby security photo and mom's index fingerprints

- CertaScan's system consists of the latest scanning technology and patented software
- Biometric ID for electronic medical records (EMRs)
- Quicker and easier to use than current ink systems
- No cleanup of messy inks or fading images
- Nurse-friendly software that saves time
- Easy to store and retrieve digital images
- Compliance with the latest NCMEC's Infant Security Guidelines and Moms are provided with an attractive cobranded keepsake

Gain a competitive advantage by being the first in your area to provide this important benefit to your patients
